

INTRODUCING THE NEW

earthLoops™
GEOTHERMAL EXCHANGE SYSTEM

HYDRO INJECTION SECURE SYSTEM

NEW!

**Water Injection Kit makes
the testing and installation
of Centennial Plastics
Geothermal EarthLoops™
faster and easier!**

- With a simple garden hose connection, it flushes water through the pipe to make sure it is free of leaks, air pockets, or contaminants!
- The weight of the water in the pipe reduces buoyancy issues for faster and easier bore hole insertion!
- Once installed, the test caps stay on both ends of the EarthLoops™, keeping it sealed and free of debris until connected to the header pipe.

For more information please contact Centennial Plastics or your wholesale distributor.

Meets Buy America
Act requirements.
